## Civil Engineering Technician/Technologist

### Job Location

Huntsville

### Date posted

July 30, 2019

### Competition ID

2019 ETHuntsville

### Description

Tulloch Engineering is a progressive, multi-disciplinary firm that believes in maintaining a small company, family-oriented feel. We believe that employees should enjoy their work and the people they work with, creating a cohesive and supportive work environment. Flexible work hours allow our employees to spend the time with their families or to pursue their passions beyond the work day.

We seek out opportunities to work on unique projects and thrive under the most challenging conditions where we bring a passion for finding solutions and a fierce enthusiasm in implementing them. Our employees are dedicated to quality and often go the extra mile to fulfill client requests with a devotion seldom found in the industry. We are excited about our work in the fields of engineering, land surveying, environmental and mapping services.

Our engineering team at Tulloch offers services to private and government sector clients throughout Ontario and across Canada. We provide solutions over a diverse range of engineering including Municipal, Transportation, Environmental, Drainage and Hydrology, Land Development and Utility Scale Renewable Energy Facilities. Our team is known for innovative thinking and maintaining client satisfaction through quality and timely work. The work environment is fast paced, challenging, and rewarding.

We are currently looking for a full time **Engineering Technician/Technologist** to join our Huntsville team. This is a permanent, full time position to begin as soon as a successful candidate is found.

### Responsibilities

- Assist Project Managers in all aspects of project delivery;
- Preliminary and detailed design and drawing preparation for various civil engineering projects (Site plans, Servicing drawings, Drainage, Roads and Highways);
- Specification writing;
- Ensuring plans are in compliance with applicable standards and drafting requirements;
- Estimation of tender quantities; and,
- Inspection and contract administration of civil engineering works.

### Qualifications

- A college diploma from a Civil Engineering Technician or Technology program or equivalent experience;
- 5-10 years experience preferred. Minimum of 2 years experience in the design and construction of civil engineering works;
- Experience in the use of analytical and design software including AutoCad and Civil 3D;
- Experience in the use of Total Station and GPS Survey Equipment would be considered an asset;
- Excellent written and verbal communication skills;
- Excellent problem-solving skills;
- Ability to work in a team environment;
- Ability to prioritize multiple projects and tasks in a fast-paced environment;

- Valid Ontario Driver's License; and,
- Willing to travel for site inspections and field work;
- OACETT C.E.T or C. Tech., designation would be considered an asset.
